PREFACE

The Inventory of Federal Archives in the States is one of the products of the work of the Survey of Federal Archives, which operated as a nation-wide project of the Works Progress Administration from January 1, 1936 to June 30, 1937, and has been continued in Massachusetts since that date as a state project of that Administration.

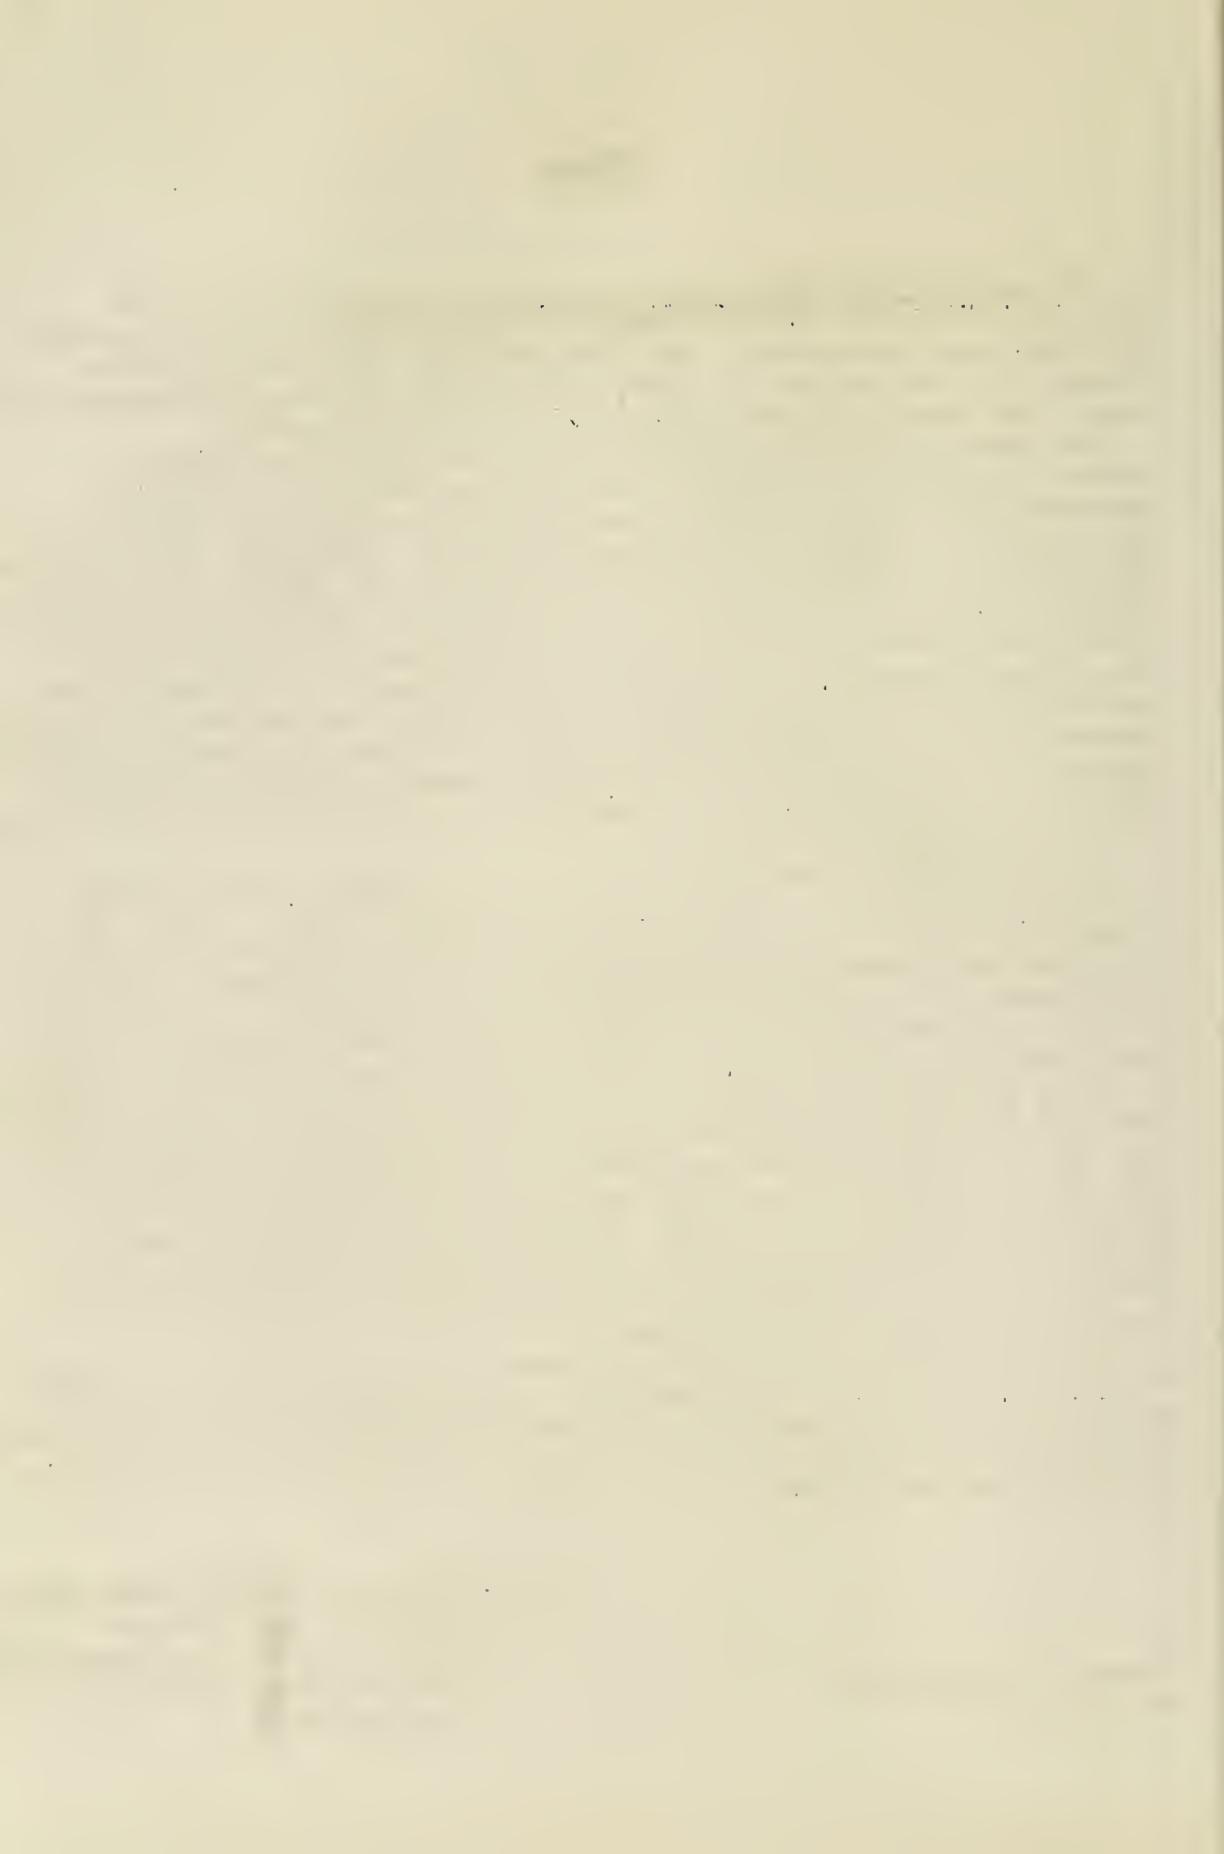

The plan for the organization of the Inventory is as follows: Series I consists of reports on the administration of the Survey, acknowledgments, and general discussions of the location, condition, and content of federal archives in the states. Succeeding series contain the detailed information secured by workers of the Survey, in inventory form, a separate series number being assigned to each of the executive departments (except the Department of State) and other major units of the Federal Government. Within each series No. 1 is a general introduction to the field organization and records of the governmental agency concerned; the succeeding numbers contain the inventory proper, separate numbers being assigned to each state in alphabetical order. Thus, in each series, the inventory for Alabama is No. 2, that for Arizona No. 3, that for Arkansas No. 4, etc.

For each local office information regarding each series, or unit of related records, is presented in the following order: title, inclusive dates ("to date" indicating an open file at the time the information was secured), general description of informational content, description of the system of filing or indexing (if any), a statement of frequency and purpose of use, form of the record itself (bound volumes, sheets in folders, etc.), linear footage, description of the containers, physical condition of the records (not stated if satisfactory), location by room number or other identifying information, and finally, the number of the Form 58SA on which this information was originally recorded by a Survey worker and from which it was abstracted for the Inventory. This form is on file in The National Archives. When it contains substantial information on addenda sheets which has not been included in the mimeographed abstract, indication of this is given by use of the reference "See addenda."

In Massachusetts the work of the Survey has been under the direction of Mr. J. W. McElroy. This inventory of the records of the Department of Agriculture in Massachusetts was prepared in the Boston office of the Survey, and was edited before final typing by Mr. Lewis J. Darter, Jr., of the Washington office.

AGRICULTURAL ADJUSTMENT ADMINISTRATION

The various commodity-control programs of the Agricultural Adjustment Administration were inaugurated in 1933. These programs were replaced after the Hoosac-Mills decision of the Supreme Court by the agricultural conservation and domestic allotment program. The field program of the AAA is administered through the offices of the county agricultural extension agents and the field records are found in their custody. These records pertaining to purely AAA activity have been separated from regular Extension Service records and have been placed in the inventory under the agency heading "Field Agent". It should be understood that these field agents are, in most cases, the county extension agents acting in their capacity as county representatives of the Department of Agriculture for the Agricultural Adjustment Administration. The commodity-control programs were operated by county commodity associations, usually through the county agents. The conservation program is administered by county agricultural conservation associations through county agents or some other designated executive head.

Many agencies of the Department of Agriculture have cooperated with the AAA, particularly agencies of the Bureau of Agricultural Economics and of the Bureau of Animal Industry. Such records have been listed under the agencies where they were found.

BUREAU OF AGRICULTURAL ECONOMICSBOSTONDIVISION OF CROP AND LIVESTOCK ESTIMATES
FIELD HEADQUARTERS
Federal Bldg., Post Office Sq.

This office was established in 1913 with an office at the home of V.A. Sanders, statistician, in Wakefield, Mass. In 1921 the office was moved to the Taylor Building in Wakefield, and in 1925 to the Post Office Building in the same town. In 1927 the office was transferred to 261 Franklin Street, Boston. In 1933 it was moved to the Custom House in Boston and in 1934 was again moved to its present location in the Federal Building. Records from the Wakefield office were transferred to the Boston office.

It has jurisdiction over the New England States. Its functions are to provide and publish statistical data, reports, estimates, and forecasts concerning crops and livestock of New England and other matters relating thereto, for the benefit of agricultural producers, dealers, and consumers. This office performs certain functions for the AAA and such records, as far as possible, have been grouped at the end of this section. However, many AAA records are not easily discernible, and since they are not separately filed under an AAA designation, it is not possible to so group all such records.

BUREAU OF ANIMAL INDUSTRY

BOSTON

MEAT INSPECTION DIVISION
FIELD STATION
Custom House, India and State Sts.

The Boston office of the Meat Inspection Division was established May 1916, at its present location on the 20th floor of the Custom House. It has jurisdiction over the area of Metropolitan Boston, eastern Massachusetts and South Berwick, Maine. This office also conducts international inspection and quarantine for the Field Inspection Division. The personnel comprises 61 employees, including an inspector in charge, a veterinarian, laymen inspectors and clerks. It has as its functions the inspection of all exported, imported, and domestic meats and meat products. It also approves or rejects all containers used by meat establishments and meat packers, and a complete file is kept of approved labels for these products. Alterations and construction of all meat establishments are supervised by this office, which maintains a file of blueprints of the work. Samples of all meat and meat food products are forwarded to the division laboratory in New York for approval or rejection.

Records of this agency are of a general routine nature and cover meat inspection in the area of Metropolitan Boston, tannery inspection for eastern Massachusetts and South Berwick, Maine, and meat and hide inspection at the Port of Boston. Most of the original records of this office are forwarded to Washington headquarters. Useless records are destroyed after five years by authority of the Department of Agriculture. Records that are retained are in excellent condition and are carefully and safely preserved in modern filing equipment.

BOSTONTUBERCULOSIS ERADICATION DIVISION
FIELD STATION
Custom House, India and State Sts.

This agency was established in Springfield, Massachusetts, in June 1917, and moved to its present location on the 20th floor of the Custom House in June 1918. The district originally included all New England but the volume of work necessitated a reduction of the area. At present this office is engaged in inspection of cattle and in tracing and correcting contributory causes of animal tuberculosis. It coordinates the activities of the State agriculture departments of Massachusetts, of Rhode Island, and of New Hampshire. The inspector in charge, four clerks, and twenty-six veterinarians comprise its personnel of 31 persons.

Originals of most records are forwarded to Washington headquarters. Duplicates, retained here, are in excellent condition and kept safe and accessible in modern filing equipment. Records over five years old are disposed of on authority from the Department of Agriculture.

WEATHER BUREAUBOSTONCLIMATOLOGICAL SECTION CENTER HEADQUARTERS
Post Office and Court House Bldg.

The first weather station was established in Boston in 1871, operating under the Signal Service and later the Signal Corps until 1891, when it was transferred to the Department of Agriculture. In New England there are now first order stations at Eastport and Portland in Maine; Burlington and Northfield in Vermont; Boston and Nantucket in Massachusetts; Providence and Block Island in Rhode Island; and Hartford and New Haven in Connecticut. Approximately two hundred stations of second order or cooperative classification, serving without pay, are scattered throughout New England. The New England Section Center occupies the entire nineteenth floor of the new Post Office and Court House Building with a storage room on the sixteenth floor. Previously the Boston office was located in Youngs Hotel, May 1929 to September 1933; old Post Office Building, October 1884 to May 1929; building at Milk and Devonshire Streets, August 1875 to October 1884; building at 103 Court Street, January 1871 to August 1875; and in the Old State House January 1870 to January 1871.

The work of this intensively cooperative organization functioning through the Boston Section Center includes: (1) weather reporting and forecasting services; (2) river observations and flood warnings; (3) marine meteorological work; (4) aeronautical observations; (5) climatological work; (6) work in agricultural meteorology. The agency maintains its own press and scientific personnel of eleven in the Boston office and nine at the East Boston Airport Station. This staff consists of senior, associate, junior, and minor meteorologists and clerks. Reports are made four times per day by telegraph, hourly by radio, and occasionally every half hour. Copies of all maps are filed in Washington once each week as an administrative check-up, summaries of which go into the permanent file at headquarters and in the local office. Observation reports of monthly, daily, and hourly readings are sent each month to Washington, D.C. Old weather-report telegrams more than three years old are periodically destroyed. Maps are destroyed after summaries thereof are made. The records of this agency are meticulously kept and suitably filed in steel cabinets. The storage room on the sixteenth floor contains some disordered records in old-fashioned wooden cabinets from which there has been some loss in various moves.

EAST BOSTONAEROLOGICAL DIVISION
COMMERCIAL AIRWAY SERVICE STATION
Municipal Administration Bldg.
Municipal Airport

This office was established in 1926. Housed originally in the United States Army Hangar, the agency moved first to the Boston Airport Corporation Building in 1927, next to the Bay State Flying Service Building in 1928, and finally to its present quarters, in 1930. The office is in a two story fireproof building of modern construction in which the federal inspector of aeronautics and the Weather Bureau have leased space. The Weather Bureau staff comprises nine meteorologists and clerks who prepare and exchange weather reports with outside stations.

This office is the central point for twenty-two substations in the New England area. It makes observations on the upper air by balloon and plane, and is devoted principally to securing weather reports for airways in the region. All information received by teletype, telegraph, and radio is carefully recorded. On the basis of its reports, special instruments make graphic pictures of the weather throughout the United States.

Its records are intact, safe, and accessibly arranged in metal drawers. With the exception of Form 1130, Airway Weather Report, copies of all reports are sent regularly to Washington, D.C. The following useless papers are disposed of at regularly designated intervals: teletype weather data, radiograms, air balloon observations, western union telegrams, and weather maps more than one year old.

676. EXPOSURE OF INSTRUMENTS, Jan. 1, 1926 to date. Forms 4067-1, records of all continuously exposed instruments. Filed alphabetically. (Monthly, official.) 3×5 loose cards, 8 ft., in drawer of steel filing case. R. 23. (7957)

NANTUCKET

GENERAL WEATHER SERVICE STATION
46 Orange St.

This station was established on October 18, 1886, under the Signal Corps of the army, and was located in the Pacific Club Building on Main Street. The agency was transferred to the Department of Agriculture in 1891, but continued at the same site until 1904 when it moved to its present location. The station displays storm warning signals for mariners; distributes other information concerning the weather to those interested, and reports its meteorological observations directly to Washington, D.C. It is quartered today in a two and a half story wooden framed building owned by the Department of Agriculture; the rooms on the first floor are used as offices and storerooms, while the rest of the building serves as living quarters for the officer in charge.

Climatological records are kept in drawers, on shelves in a wooden cabinet, or on top of a roll top desk. Yearly summaries of weather, monthly reports of wind signals, and station memoranda, are kept in a desk and on a table in the rear office. The older records such as circular letters, on obsolete forms; letters and reports of the chief operator concerning submarine cables formerly operated by the government, and certain early letters pertaining to agency affairs are stored in a wooden cupboard in the washroom.
